About the Program :	The Observership program is an informal shadowing experience. Here the doctors or fellows will be allowed to participate in Out-patient department consultations and to watch Pain Management Interventions. They will be along with doctors doing our in-house Fellowships. The Observers during their period will get exposure to seeing a variety of pain medicine cases. Our centre is specialised in diagnosis and treatment of patients suffering from a majority of Musculoskeletal pain conditions. We have dedicated teaching sessions every week and the Observers will have to participate in it. They are expected to actively engage in Case presentations, journal clubs at our centre

Charges and Fees:

\*The 1 Week Observership Programme is free for the Fellows of 2023 batch.
